PROFILE

Mechanical Engineering graduate from Universitas Indonesia with over seven years of experience across industries. Most of my work has focused on business analysis, process improvement, business operations, and transformation.

I currently work as Expert Staff to the VP of Operations at PT Nobi Putra Angkasa. My responsibilities involve cross-functional business operations, ERP transformation, process improvement, and management reporting.

I'm also actively exploring artificial intelligence through AI agents, different agent harnesses, Model Context Protocol (MCP), and agent orchestration, applying them to real projects while continuously developing my understanding.

PROFESSIONAL EXPERIENCE

PT Nobi Putra Angkasa — Karawang, West Java

Industrial manufacturing: cable support systems, electrical panels, and steel structures

Expert Staff to VP Operations — Sep 2024–Present

- **Order Review & Operational Coordination —** Review Sales Orders, Purchase Requests, and Purchase Orders before VP Operations approval, focusing on supporting documents, commercial details, and compliance. Coordinate with relevant departments to clarify unusual customer requirements, translate them into operational actions, and follow through until issues are resolved.
- **ERP Transformation —** Co-led the migration from Scala to Odoo as one of the main internal PICs. Worked with departments and consultants to translate business requirements into system workflows, validate transactions, and resolve implementation issues. Continue to manage and improve business processes in Odoo 18.
- **ERP Process Improvement & Monitoring —** Develop Odoo operating procedures, monitor ERP workflows to ensure business processes work as intended, and collaborate with users to resolve operational issues. Evaluate user requests and implement feasible system improvements.
- **Management Reporting & Performance Monitoring —** Develop reports and dashboards covering order-to-payment progress, project profitability, and operational performance. Organize and present data to highlight issues, identify improvement opportunities, and support management decisions.

PT Cibuni Teknik Sejahtera — Bekasi, West Java

Engineering services: casting, machining, fabrication, pumps, and industrial work

Co-Founder | Business Operations & Project Management — Sep 2022–Sep 2024

- **Business Setup & Operations —** Co-founded an engineering services company, managed initial business legalities and permits, and supported operations involving customer quotations, procurement, suppliers, workforce coordination, and customer and supplier payments.
- **Operational Reconciliation & Invoicing —** Developed a workflow to track and reconcile daily production output for manufacturing services, including cast iron finishing billed by kilograms processed. Consolidated monthly output records, coordinated billing reconciliation with customers, and prepared invoices based on completed work.
- **Machining Costing & Profitability Analysis —** Developed and tested multiple machining cost calculation methods, including CAD-based simulations, considering processing time, work complexity, labor costs, and workshop overhead. Used these calculations to review quotations and evaluate project profitability against market pricing.

PT Traktor Nusantara (Astra Group) Jakarta

Heavy equipment sales and after-sales service operations

Service Profitability & Business Control Feb 2022–Aug 2022

- **Business Operations —** Served as the main operational PIC for a new Service Marketing business line, handling customer quotations, supplier availability checks, promotional materials, sales follow-ups, and daily business administration.
- **Pricing & Profitability Analysis —** Reviewed supplier costs, quotation pricing, and estimated profit margins, while monitoring actual service profitability to support pricing reviews and business performance evaluation.

Cost Control Analyst Apr 2019–Jan 2022

- **Cost Control & Journal Validation —** Monitored financial performance across 17 branches, investigated unusual cost patterns, and reviewed costing journals posted to the Service Division. Coordinated with Accounting and other divisions to resolve cost allocation disputes and correct inaccurate journal entries.
- **Maintenance Contract Profitability Analysis —** Analyzed Full Maintenance Contract profitability by reconciling spare parts consumption, labor costs, tools, and overhead with equipment quantities, operating hours, and site conditions. Evaluated costing assumptions against actual expenses and presented findings to management.
- **Purchase Order Process Improvement —** Developed a centralized purchase order proposal and approval workflow using Google Forms, Google Sheets, and Apps Script across 17 service branches, standardizing document submissions, profitability reviews, and management approvals.
- **Fuel Payment & Expense Control —** Evaluated fuel payment providers and coordinated the implementation of Pertamina Retail's centralized fuel card system for approximately 40 service vehicles, reducing the need for employees to cover company fuel expenses. Monitored consumption patterns, account balances, and top-up requirements.
- **Multi-Site Operations & Cost Control —** Developed a centralized Google Sheets reporting system to monitor equipment availability, breakdowns, parts consumption, and operational costs across customer sites. Also developed an approval process for high-cost parts replacement requests involving technical review.

SELECTED PROJECT

Odoo Analytics & Control Tower (Ongoing) — Designing and developing a business monitoring and control system using Odoo data, focusing on order-to-payment tracking, profitability analysis, transaction validation, and operational performance reporting.

SKILLS & TOOLS

Business & Operations: Business analysis · Cost control · Profitability analysis · Process improvement · ERP transformation · Management reporting

Systems & Tools: Excel · VBA · Google Sheets · Apps Script · Looker Studio · Odoo · SAP ECC6

Developing Skills: Python · SQL · AI agents · MCP · Agent orchestration

EDUCATION & LANGUAGES

Universitas Indonesia — B.Eng., Mechanical Engineering (International Program) | 2014–Jan 2019 | GPA 3.22/4.00

Tokyo Institute of Technology, Japan — International Exchange Student | Apr–Aug 2018

Languages — Indonesian — Native | English — Professional working proficiency
