PROFESSIONAL PROFILE

Process improvement and operational-excellence professional with 7+ years across business-process design, operating controls, ERP transformation, workflow standardization, profitability governance, and cross-functional implementation. Experienced in turning operating gaps into clearer processes, responsibilities, approval logic, controls, and management follow-up across industrial and engineering environments.

SELECTED IMPACT

ERP PROCESS TRANSFORMATION	3–5 REQUESTS/DAY STANDARDIZED	IDR 8–10B/MONTH CONTRACTS
Co-led Scala-to-Odoo business/process migration, translating end-to-end operating requirements into system structures, controls, and post-go-live governance.	Built a centralized OPEX approval workflow across service branches, standardizing evidence, profitability checks, approvals, and transaction controls.	Built contract-profitability analysis that challenged fixed cost assumptions and contributed to management reassessing the contract model.

PROFESSIONAL EXPERIENCE

PT Nobi Putra Angkasa — Karawang, West Java

Manufacturer of cable support systems, electrical panels, steel structures, and related industrial solutions

Process Improvement & Transformation | **Official title: Expert Staff to VP Operations** | Sep 2024–Present

- **Process transformation** — Co-lead the business/systems workstream of the Scala-to-Odoo migration, translating operational requirements into process structures/configurations and validating continuity across core functions.
- **End-to-end process governance** — Define and maintain operating protocols across Sales, Procurement, Inventory, Manufacturing, Quality Control, Accounting, and Delivery, including responsibilities, approvals, transaction rules, controls, and exceptions.
- **Control & exception management** — Review SO/PR/PO transactions before VP Operations approval for profitability, commercial logic, documentation, chronology, and process compliance; coordinate root-cause resolution across functions.
- **Process intelligence** — Develop the Odoo Analytics / Control Tower around process relationships, traceability, KPI logic, validation rules, exception conditions, and management follow-up, using AI-assisted implementation while owning business logic and acceptance.

PT Cibuni Teknik Sejahtera — Bekasi, West Java

Engineering products and services across casting, machining, fabrication, pumps, and industrial work

Co-Founder | Business Operations & Process Execution | Sep 2022–Sep 2024

- **End-to-end workflow ownership** — Oversaw customer requirements, quotation, sourcing, procurement, workshop execution, finance/admin follow-up, progress monitoring, and delivery as one connected operating flow.
- **Operating setup & improvement** — Established practical routines across manpower, workshop readiness, materials/equipment, suppliers, customers, finance, and administration as the business developed.

PT Traktor Nusantara — Astra Group — Jakarta

Astra Group company serving industrial equipment and after-sales/service operations

Service Profitability & Business Control | Feb 2022–Aug 2022

- **Commercial process controls** — Reviewed supplier costs, commercial conditions, expected margins, selling-price proposals, and vendor options before management decisions.
- **Vendor flow improvement** — Sourced alternatives, prepared quotations, and coordinated supplier-side execution through a controlled commercial handoff to Sales.

Cost Control Analyst | Apr 2019–Jan 2022

- **Workflow standardization** — Built and governed a centralized Google Forms, Sheets & Apps Script OPEX workflow across service branches, standardizing required evidence, profitability checks, approval flow, and transaction controls for approximately 3–5 requests per working day.
- **Performance governance** — Produced weekly cost, Gross Profit, cost-reduction, and profitability reviews across 17 branches / approximately IDR 11–15B monthly revenue, creating a consistent management follow-up cadence.
- **Profitability problem solving** — Built analysis across approximately IDR 8–10B monthly Full Maintenance Contract revenue, challenging existing assumptions and contributing to management reassessing the contract model.
- **Root-cause & reconciliation** — Partnered with Accounting on journal/cost-allocation/accrual issues and supported inventory reconciliation covering approximately IDR 10–20B in system-recorded value.
- **Operational controls** — Implemented RFID fuel monitoring for approximately 40 vehicles / around IDR 50M monthly usage and built workforce-capacity analysis from workload and mechanic-hour assumptions.

SELECTED SYSTEMS PROJECT

Odoo Analytics / Control Tower — Process-intelligence layer used to make end-to-end workflows, controls, and exceptions more visible.

- **Process design** — Define process relationships, control points, KPI logic, traceability, validation rules, exception conditions, and follow-up requirements.
- **Operational validation** — Use the initiative to validate process behavior, investigate exceptions, and support root-cause analysis across live transactions.
- **AI-assisted implementation** — Own process logic and acceptance while using AI-assisted SQL, PostgreSQL, Python, frontend, and workflow implementation.

CORE CAPABILITIES

PROCESS & IMPROVEMENT Process Improvement · Business Process Mapping · Workflow Design · SOP / Operating Protocols · Root-Cause Analysis · PDCA · Kaizen / CI · Lean & Six Sigma Fundamentals

GOVERNANCE & CONTROLS Approval Controls · Transaction Validation · Exception Handling · Operational Governance · Profitability Controls · Data Reconciliation

SYSTEMS & ANALYTICS Odoo 18 · Odoo 16 Migration · SAP ECC6 · Advanced Excel · Google Sheets · Looker Studio · Google Apps Script · VBA

AI-ENABLED OPERATIONS AI-Assisted Process Analysis · Workflow Automation · Agent-Based Implementation · Output Validation · SQL/PostgreSQL/Python - Project-Based

EDUCATION & LANGUAGES

Universitas Indonesia — Bachelor of Mechanical Engineering, International Program | 2014–Jan 2019

Tokyo Institute of Technology, Japan — International Exchange Student | Apr–Aug 2018

Languages — Indonesian: Native | English: Professional Working Proficiency
