

FAUZAN WIDIANTO

Analytical Systems Builder | Business Operations | ERP Analytics | BI | Process Improvement

Bekasi, Indonesia | fauzan.widianto41@gmail.com | +62 821-5647-0127 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Analytical Systems Builder with 6+ years of experience across business operations, cost control, profitability analysis, ERP platforms, reporting automation, dashboard development, and cross-functional operations support. Experienced in manufacturing operations, engineering services, and heavy equipment services, with exposure to ERP migration, transaction review, operational reporting, inventory reconciliation, pricing support, margin review, and management reporting. Currently supporting VP Operations in a manufacturing operations environment, with focus on Odoo ERP ownership, profitability control, transaction review, dashboard development, reporting automation, and operational visibility. I work best on problems that require understanding business flow, system logic, and data relationships, then turning messy operational information into clearer review structures for decision-making.

CORE COMPETENCIES

Business & Operations	Business Operations, Cost Control, Profitability Analysis, Pricing Analysis, Margin Review, Operational Governance, Process Improvement, Cross-Functional Coordination
ERP & Business Systems	Odoo ERP, SAP ECC6, ERP Migration, ERP Ownership, Business Process Mapping, Transaction Review, Data Validation, Source-of-Truth Review
Analytics & Reporting	Business Intelligence, Dashboard Development, KPI Logic, Operational Reporting, Management Reporting, Data Validation, Business Logic Definition
Working Tools	Excel, Google Sheets, Apps Script, VBA, Looker Studio, SQL, PostgreSQL, Python, UiPath, AI-Assisted Development

SELECTED PROJECT

Odoo ERP Analytics Platform | Jun 2026 - Present

Business Analyst / Project Lead / AI-Assisted Builder

Portfolio: www.fwidianto.com/Projects/Odoo-ERP-Analytics.html

Built a public-safe Odoo ERP Analytics case study showing how operational ERP records can be mapped, reviewed, and translated into clearer business review views for operational visibility, profitability control, and management decision support.

- Mapped order-to-cash and procure-to-pay transaction flows across sales, purchasing, production, delivery, invoicing, payment, cost, and margin records.
- Defined ERP transaction review logic for operational follow-up, dashboard concepts, and management review.
- Structured ERP data relationships using SQL, PostgreSQL, Python, and AI-assisted development without exposing internal company data.

PROFESSIONAL EXPERIENCE

PT Nobi Putra Angkasa | Sep 2024 - Present

Business Operations & ERP Analyst / Expert Staff to VP Operations | Karawang, Indonesia

Support VP Operations in operational governance, ERP management, profitability review, reporting automation, and cross-functional business process improvement within a manufacturing operations environment.

- Act as first-line reviewer for Sales Orders, Purchase Requests, and Purchase Orders before executive approval, supporting transaction governance and profitability control.
- Serve as internal Odoo ERP owner after migration from legacy Scala system, supporting users, validating transaction flows, and coordinating workflow improvements.
- Supported ERP migration from Scala to Odoo by validating business processes, reviewing system outputs, coordinating with consultants, and helping maintain operational continuity.
- Develop dashboards and automated reporting workflows to monitor sales, purchasing, order flow, profitability, and operational performance.
- Provide analytical reporting and business insights to support management reviews and operational decision-making.
- Lead the Odoo Analytics Platform initiative by defining business logic, KPI structures, data relationships, and reporting requirements for deeper operational visibility.

Platforms and working tools: Odoo ERP, Excel, Google Sheets, Apps Script, VBA, Looker Studio, SQL, PostgreSQL, Python, AI-assisted development

PT Cibuni Teknik Sejahtera | Sep 2022 - Sep 2024

Project Manager / Business Operations | Bekasi, Indonesia

- Managed operational and project activities within an engineering services business focused on machining, casting, fabrication, pump services, and trading activities.
- Coordinated project execution from customer requirements to operational delivery, aligning customer needs, workshop capacity, manpower, vendors, and internal resources.
- Supported pricing considerations, cost monitoring, procurement coordination, billing follow-up, workflow management, and workshop operational setup.

Traktor Nusantara | Jan 2022 - Aug 2022

Service Profitability & Business Control Staff | East Jakarta, Indonesia

- Handled service profitability analysis, commercial performance review, pricing support, and management reporting within the heavy equipment service business.

- Analyzed pricing structures, cost behavior, profitability trends, and maintenance contract performance to support commercial decision-making.
- Developed executive dashboards, operational reporting tools, and a maintenance planning/profitability simulation calculator presented to the Board of Directors.

Traktor Nusantara | Apr 2019 - Dec 2021

Cost Control Analyst | Pulogadung, Indonesia

- Started professional career in cost control, operational reporting, profitability analysis, inventory analysis, and business performance monitoring within heavy equipment services.
- Conducted historical service contract profitability analysis by comparing actual costs against revenue allocation assumptions.
- Performed inventory reconciliation analysis and identified discrepancies estimated at IDR 10-20 billion, improving visibility of reporting and transaction issues.
- Developed workforce planning tools, dashboards, and operational reports using SAP ECC6, Excel, Google Sheets, VBA, and Looker Studio.

PT Astra Agro Lestari Tbk | Jan 2018 - Mar 2018

Internship | Sei Bengkuang, Indonesia

- Gained exposure to palm oil mill operations, including process flow from harvested fruit to crude palm oil production.

EDUCATION

Universitas Indonesia - Bachelor of Mechanical Engineering, 2014-2019

Tokyo Institute of Technology - Non-Degree Exchange Program, Mechanical Engineering, 2018

CERTIFICATIONS, PUBLICATION & INTERESTS

Certifications: Programming Foundations: Databases; Registered as an International Exchange Student; Participant in The 10th International Meeting on Advances in Thermofluids 2018; Completed Research: Numerical Simulation of Churning Loss of Oil Bathed Gear System.

Publication: Aquadest Production System as Steam Turbine Bottom Cycle III: Influence of Wastewater Percentage and Pinch Point Temperature Difference of Condenser.

Interests: Financial markets, macroeconomics, automation, AI-assisted workflows, business analytics, operations improvement, and turning complex information into simpler decision systems.
